REPORT A.Y. 2018-19

Report on Digital Retrieval

Date: 10th August 2018

An IQAC workshop on "Digital Retrieval" was organized at Clara's College of Commerce on 4th August 2018 at 10.00 am in the Computer Lab. All heads of the departments along with their respective faculty members were present to attend the workshop.

One of the most challenging dimensions of digital learning resources is simply the method of identifying, filing and accessing the digital file. An area of emerging interest in the storage and retrieval aspect of digital file management is 'tagging' the file with the appropriate keywords, labels and descriptions, referred to as 'meta tags', in order to quickly locate the file when needed.

The workshop was conducted by Dr. Santosh Hulagabali to understand the digital tools that one need to have access that would enable to quickly gather content and what methods does one have to assign information to these learning resources. The session was very interactive and helpful for the faculty members.

Prepared by,

Vidushi
