Report on 'A Session on Preparation of SSR And Documentation of SDP & FDP'

Date: 20/10/2022

Venue: IT Lab

SDP/FDP: FDP

Name of the resource person: Dr. Sujatha Dhokate

Objectives: -

1. To understand the procedure of submission of SSR for NAAC.
2. To prepare documents and proof regarding various criteria of NAAC.

No of Beneficiaries: 17

Organizer: IQAC

Report: -

Dr. Sujatha Dhokate, the coordinator of IQAC from Malini Kishore College of Commerce & Economics, Vile Parle was the resource person who conducted the session on Preparation and Documentation for SSR.

First of all, Sujatha Ma'am has informed us about her experience with the preparation of SSR, DVV, and the submission of IIQA along with the visit of the NAAC peer team. Ma'am suggested that for Criteria II, Teaching Learning evaluation is very important as the college has secured less scores in these criteria. For criteria I, III, and V it is also very important to secure a higher score from NAAC. Documentation is a pre-requisite for each criterion, without documentary proof we can't claim anything. About 70% score is calculated by the software of NAAC, and the remaining 30% score is calculated by the peer team when they visit the college. Visiting the NAAC peer team is very crucial as they verify each and every file of different criteria. They visit all the departments. Departments and committees have to keep files ready for verification.

The Principal and Coordinator of IQAC are required to prepare a presentation and present the same. At the end of the session, the teachers asked doubts and the resource person cleared the doubts of the teachers. The session ended with a vote of thanks given by Dr. Babita Kanojia.

Outcome: This session was useful and beneficial to the teachers in preparing SSR documents.

The latest version is Tally 9, which offers more features for businesses of varying sizes and has updated GST functions. Although described as accounting software, it does far more than that. ERP stands for Enterprise Resource Planning, so Tally ERP monitors all the day-to-day business data and resources of an organization or company. It has the power to integrate accounting functions with finance, inventory management, payroll, production, purchasing, and sales applications.

Tally.ERP has many attractive features and advantages for users. It supports multiple languages simultaneously, which is vital for organizations with employees in numerous countries. The accounts can get entered in one language, and reports generated in others. Tally also can create and maintain accounts for up to 99,999 companies, automate employee records, and consolidate financial records. In addition, Tally offers some distinct advantages. The licensed software is inexpensive, easily implemented, and customized. It supports multiple operating systems and does not need to be run exclusively on one or the other.

Because of its comprehensive nature, consolidating many aspects of an organization's finances into one program, there are many career prospects linked to Tally. Primarily, accounting careers like senior accountant, junior accountant, freelance accountant, and accounts executive might come to mind. However, Tally may also get used by professionals who manage an organization's resources.
