F) DESCRIPTION

Rapid constructions and mushrooming housing colonies have led to depletion of the green cover in many parts of Mumbai. The importance of trees in purifying the air, reducing global warming, preventing soil erosion, conservation of water, maintaining the ecological balance, providing natural resources as medicines, habitats for faunal species, providing nutrients to the soil etc. is well known. Unfortunately, the overall green cover, not just in Mumbai but in other parts of the country is reducing and as a consequence, pollution is increasing at an alarming rate. Increasing the green cover by tree plantation is one of the easiest yet effective measures towards reducing this imbalance. As we all know that the whole world is facing the problem of global warming and to recover from such problem planting the trees is become one of the most important.

N.S.S. unit of Clara's College of Commerce organized Tree Plantation Drive (Van Mahotsav) on 7th July, 2018. The event was coordinated by Mr. Shahid Ansari and Ms. Ruchita Pandhare. The saplings were supplied by the local municipality corporation. N.S.S. volunteers planted 15 trees in the local area of Versova. In order to restore eco-balance,

deforestation drive was taken with all seriousness. N.S.S. volunteers planted saplings, and fenced them and watered the plants.

Tree planting event connected not only the students to the benefits of trees and fostered environmental sensitivity in them. It also brought them closer to the environment.

F) DESCRIPTION:

With the worldwide edge of abolition of polio in 1988 following World Health Assembly resolution in 1988, Pulse Polio Immunization programme was launched in India in 1995. Children in the phase group of 0-5 years administered polio drops during National and Sub-national inoculation rounds every single year. Around 17.4 crore children of less than five years across the country are given polio drops as part of the initiative of Government of India to withstand polio purge from the country.

The NSS Volunteers worked with BMC to give polio drops to children aged 5 and below. The volunteers sat at the booths, or went door to door at various societies giving the polio drops to children. But, before they could do so, NSS students were trained by medical professionals regarding the same.

This event helped the volunteers to understand themselves the harmful effects of Polio Virus and the vaccine that helps fight it, while also being able to help thousands of children immune against this terrible disease.

F) DESCRIPTION:

Gender Sensitization is one basic requirement for the normal development of an individual. Without being sensitive to the needs of a particular gender, an individual may refrain from understanding the opposite gender and in some acute cases even him or herself. It is a cruel realism that women have been mistreated in every society for ages. The irony lies in fact that in our country where women are worshipped as shakti, the violence is committed against her in all sections of life. She is being looked down as commodity or as a slave.

The session on Gender Sensitization was conducted by Mr. Shripad Joshi. Awareness amongst the students was being spread such that, though we have entered into the contemporary era still the fact remains the same that women in the society cannot be uplifted. With the help of this session, doubt was cleared and a different point of view for the same was presented. All the students actively participated in the session and the session helped to spread the awareness.

F) DESCRIPTION:

The tobacco epidemic is one of the biggest public health threats the world has ever faced. It is observed in the present scenario that college students are vulnerable to tobacco abuses of cigarette smoking, chewing tobacco and many such other kinds. It is estimated that cigarette smoking accounts for about one-third of all types of cancer, including 90 % of lung cancer cases. Both behavioral intervention like counseling and medication can help addicts quit their habit. It is very important to make youngsters, especially students, aware of the need to stay away from any form of tobacco as several reports and surveys have revealed that teenagers consume tobacco more than any other age group.

With a motive to spread awareness against tobacco use and its ill-effects, N.S.S Unit of Clara's College Of Commerce participated in an activity '**Pledge for life-Tobacco Free Youth**' on 11th July 2019. Volunteers took a pledge that they will not consume tobacco in their life. Program officer Mr. Shahid Ansari motivated volunteers to stay healthy and shared his noble views on cancer awareness and its prevention. He also presented a short video regarding awareness against tobacco on the occasion which was a source of inspiration for all.

F) **OBJECTIVE:** To discuss various benefits of organic food over the traditional food.

G) **DESCRIPTION:**

Organic foods have been grown or farmed without the use of artificial chemicals, hormones, antibiotics or genetically modified organism. In the present world the preferences and choice of foods are changing every moment. At one side there is a constant increase in the number of people who are living their life on junk food while on the other side there is a group which is gradually becoming a diehard supporter of Organic Food. People have started to believe organic food as much better choice over the traditional food.

In order to throw light on this topic, N.S.S. unit of Clara's College of Commerce organized discussion on 'ORGANIC FOOD'. The aim of discussion was to enhance the learning in both effective and cognitive domains. It enhances communication skills, leadership quality and thinking capacity. Some volunteers argued for the organic food and some against the organic food. Volunteers were well prepared and they used various skills like overstatement, definition, rhetoric, irony etc. to convince their opinion. The participants, armed with statistics and data validated and made their arguments more emphatic with right facial expressions, body movements and gestures.

Overall though, the discussion was positive because each of us contributed good information and most of us listened with interest when others members were sharing their ideas.

E) OBJECTIVE: To enhance the tree cover on the campus and to sensitize the students towards the importance of trees.

F) DESCRIPTION:

The importance of tree plantation is not new to us and trees have played a major role in the evolution of life, as we know it today. People have been trying many things to cope with the difficult times in the face of the COVID -19 Pandemic. We live in the earth planet and we know that without trees, plants, water, etc. we cannot make it. We live in the environment and use the resources to meet our needs. While meeting ever-growing needs, we put pressure on the environment. When the pressure exceeds the carrying capacity, it creates a serious problem of environmental degradation. Therefore, there is a need to create awareness about environmental protection.

In order to spread the message of 'THINK GREEN-LIVE GREEN' in society, N.S. S unit of Clara's College of Commerce organized Tree plantation Drive on 4th July 2020. As the public gathering has been prohibited in order to curb the spread

of contagious diseases, Covid-19, NSS volunteers planted trees in their respective local areas. Volunteers planted 23 saplings in their respective local areas to raise awareness and consciousness about the environment among the masses. The program created a great stir among the public too.

(E) **OBJECTIVE:** The current global situation of the COVID-19 pandemic, which has taken a huge toll on human lives and health, Volunteers, has planned to contribute and give back to society with its small effort.

F) **DESCRIPTION:**

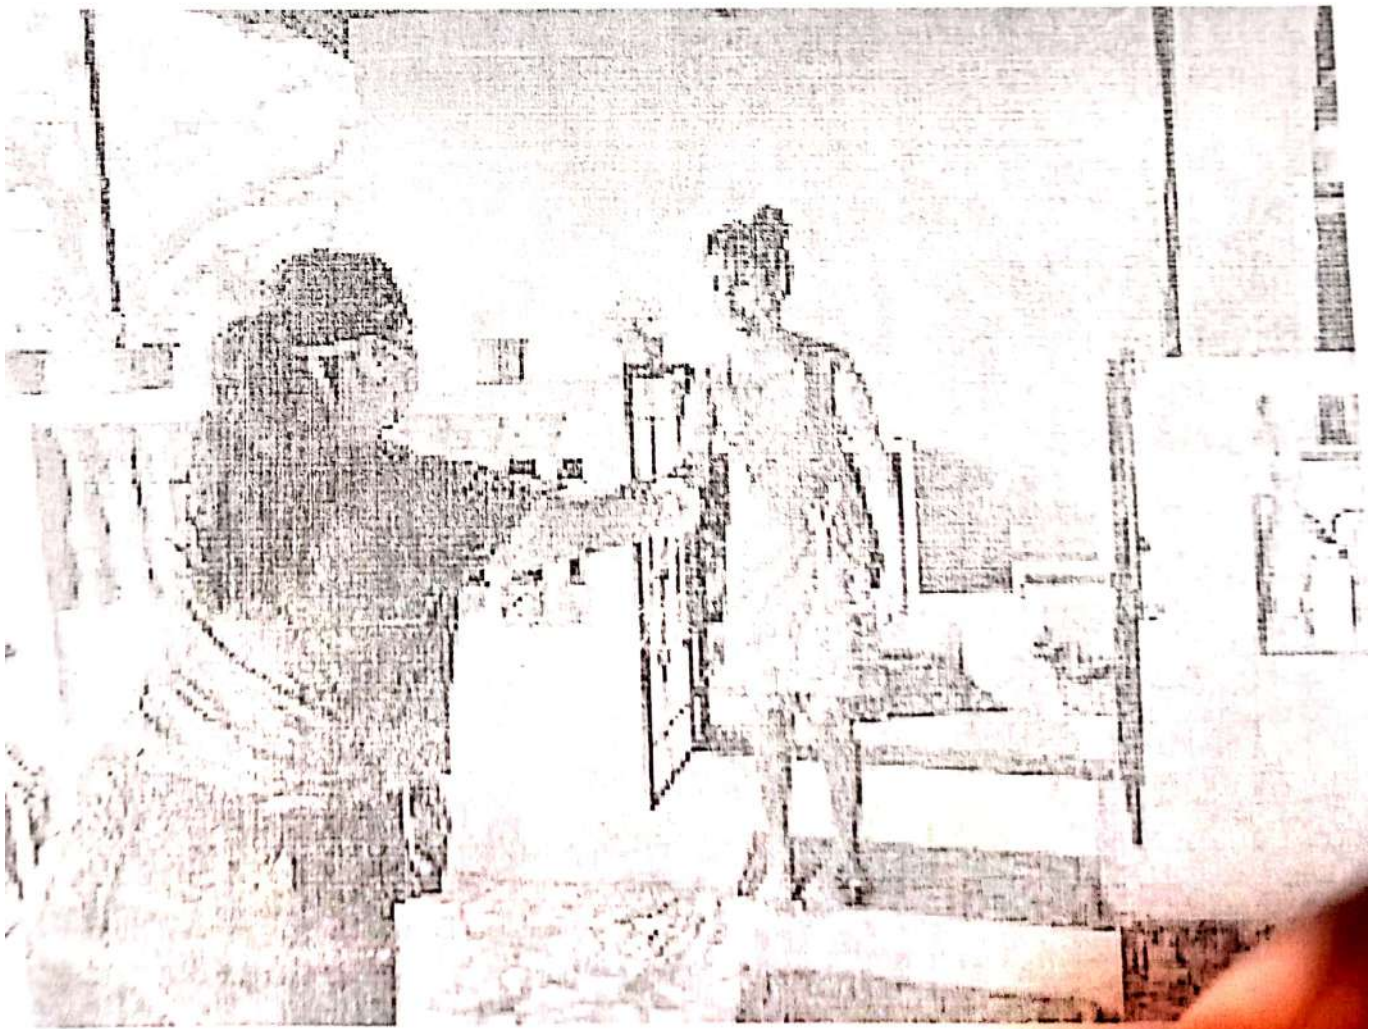

Due to the lack of effective treatment and the growing number of COVID positive cases even during the lockdown period, Prime Minister Modi had emphasized following the AYUSH guidelines with homeopathy and Ayurveda for protection against COVID-19. These AYUSH guidelines released in January 2020 can be found on the PIB website After facing criticism in India and internationally, the ministry of AYUSH released Annexure I & Annexure-II, that quoted an Italian research review (Bellaire) to stand behind the statements made earlier and to give proof of a mechanistic understanding of Arsenic Album 30 in 'boosting immunity against COVID-19.

As suggested by the government of India, Arsenic Album 30 medicine helps to boost the immunity system. Volunteers distributed Arsenic Album 30 in their societies because during the lockdown, medicines are not accessible to the people and they are unaffordable for some people. The people responded very positively and appreciated the efforts of volunteers in carrying out this task when people do not have any means to go out and seek help due to lockdown.
