Sir asked us that we have to put a lot of efforts for the FY where new subjects have been introduced so we have to read our content thoroughly and then explain to the students by giving proper examples. IQAC coordinator Dr.Babita Kanojia gave a detailed explanation regarding implementation of NEP. The courses in the FY BCOM,BCOM(MS),BAFand BAMMC have around 9 to 10 subjects depending on the credits they have. The subjects having 4 credits are for 100 marks and subjects having 2 credits are for 50 marks. The syllabus is similar for many subjects.There is one major subject for all the courses in sem 1 and from 2nd sem onwards we have minor subjects, Open Elective is there in both the semesters.

It is the duty of the coordinators to ensure that where the subjects are the same classes can be merged. The teachers were advised to give quality work to the FY as it will be setting a base for them. Students must be encouraged to take part in curricular and cocurricular activities as it will be included in their marksheet.The teachers were encouraged to have knowledge on all the subjects. Excel contains a large number of boxes called cells that are ordered in rows and columns.Excel is an incredibly powerful tool for getting meaning out of vast amounts of data. But it also works really well for simple calculations and tracking almost any kind of information. The key for unlocking all that potential is the grid of cells. Cells can contain numbers, text, or formulas.

Outcome:

1. Improved data integrity and consistency.
2. Improved data accessibility and control.
3. Reduced data redundancy and inconsistency.
4. Provides a platform to access and share data faster.
5. Better data backup and recovery.
